 [irohitsahu](#)

I hold a strong conviction that with steadfast dedication and tireless effort, anything is possible. I am eager to expand my knowledge and embrace new opportunities for self-improvement.

PROFILE

As a highly motivated and detail-oriented web developer, I possess a strong foundation in MERN stack development, Java programming, Spring Boot, and SQL database management. I have experience in developing responsive, user-friendly web applications, and a proven track record of delivering quality work on time. I am proficient in JavaScript, HTML, CSS, and various front-end frameworks. Additionally, I possess excellent communication and problem-solving skills and am committed to continuous learning and staying up-to-date with emerging technologies. I am passionate about leveraging my skills and creativity to contribute to the success of an innovative and dynamic team.

PROJECTS

Online Placement Agency

(Jan 2023 – March 2023)

Lead a team of 4 people. This is a full-stack project built using MERN stack that enables job seekers to search for job listings and apply to them, and employers to post job openings and search for potential candidates.

The portal utilizes MongoDB to store job listings and user data, Express.js for backend development, React for frontend development, and Node.js to enable server-side logic and routing. By building this portal, I gained valuable experience in web development using the MERN stack, as well as skills in database management, server-side programming, and front-end design.

Portfolio Website | Rohit Sahu

(Jan 2023 – Present)

This is a responsive website built using pure HTML, CSS, JavaScript. It showcases some of the projects that I have worked on, and the site is hosted using Google Firebase Hosting.
