## Professional Experience

**JUNE 2023 - PRESENT**

**UI/UX Developer | Globussoft Technology | Bhilai, Chhattisgarh**

*Tech Stack: Vanilla JavaScript, TypeScript, Styled Components, PHP Laravel, HTML, CSS, Bootstrap, AmChart, Vite, TypeScript, Tailwind, Flowbite*

During my tenure at Globussoft, I have worked on several high-impact projects, contributing significantly to their development and success.

- **Browser Application -** Worked on the Brave browser source code, redesigned elements aligning with organizational needs.
- **Music Request Platform for DJs -** Implemented responsive designs to ensure seamless user interaction across devices.
- **Project Management and Collaboration Platform -** Ensured a clean and intuitive interface, facilitating better project management and team collaboration.

Additionally, I have worked on several projects, these experiences have honed my skills in front-end development and UI/UX design, enabling me to contribute effectively to dynamic and innovative teams.

## Projects

These are the projects I have independently learned and developed These projects demonstrate my continuous learning and application of front-end development skills.

- **Portfolio Website V1 -** Developed the initial version of my personal portfolio website to showcase my skills and projects.
  *Tech Stack -* HTML, CSS, JavaScript
- **Portfolio Website V2 -** Improved upon the first version with enhanced design, user experience, and additional features to better represent my capabilities.
  *Tech Stack -* Vite, ReactJS, Styled Components, Tailwind
- **OpenAI Image Generator -** Created an image generator leveraging OpenAI's API to produce custom images based on user inputs.
  *Tech Stack –* Vite, ReactJS, TypeScript, Tailwind, RapidAPI - OpenAI-DALL-E3
- **Hire Path -** Developed a platform to streamline the hiring process, including features for job postings, applications, and candidate tracking.
  *Tech Stack -* Vite, ReactJS, MaterialUI, React-Router-Dom, Context API, Redux
- **Phonebook -** Built a comprehensive phonebook application with features for adding, editing, and managing contact information efficiently.
  *Tech Stack -* Vite, NextJS, ShadeCN, Context API

## Skills

**Technical Skills**
- **Libraries and Frameworks** • *ReactJS* • *NextJS*
- **Languages** • *JavaScript* • *TypeScript* • *HTML* • *CSS* • *SCSS/SASS/LESS*
- **State Management** • *Context API* • *Redux*
- **Routing** • *React Router Dom* • *Next.js Router*
- **Build Tools** • *Vite*
- **Version Control** • *Git* • *Bit Bucket*
- **Task Management** • *Jira*
- **Styling Frameworks** • *Tailwind* • *Styled Components* • *ShadeCN* • *MaterialUI* • *AntDesign* • *Bootstrap*
